

G12-80S Special Edition

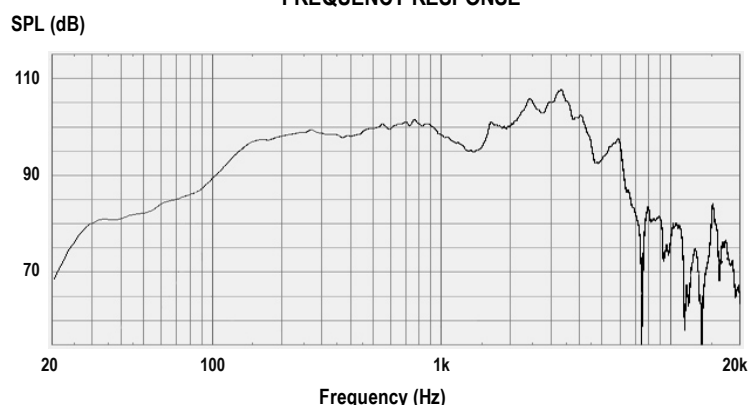

A heavyweight performer in every sense of the word, the G12-80S delivers the very essence of modern Celestion guitar tone. With a tight controlled bass and shimmering presence, this speaker has a huge headroom and high output sensitivity built in, so there's plenty in reserve for when you're ready to get LOUD.

The G12-80S is fluid and articulate with enough responsiveness to play fast, clean-picking country. Load into a 4x12 and you're ready to deliver a full-blooded metal attack.

GENERAL SPECIFICATIONS
