

The D-series is an innovative speaker line designed for the new generation of Digital, modeling, profiling and IR-based amplifiers. The series is also indicated for acoustic guitar amplification. Not recommended for traditional electric guitar amplifiers.

Sound Features:

Extended response on the upper range, to transduce the detail of the digital effects and the harmonic content of a mic'ed guitar cabinet. Directly derived from the traditional guitar speakers, with integrated paper surround, the C12D is able to return the powerful, organic, warm tone and character of a classic guitar amplifier, but also the treble content and the complex harmonics of the overdrive, modulation, delay and reverb effects, as well as the crisp, natural tone of an amplified acoustic guitar.
