

CDX1-1010

- Very lightweight, low-profile ferrite magnet compression driver
- 20Wrms (AES standard) power handling and 107dB sensitivity, 1500-20,000Hz frequency range
- Finite Element Analysis (FEA) techniques used to optimise both magnetic and acoustic design
- Ideal for entry-level two-way and three-way sound reinforcement cabinets
- CDX1-1020 supplied with partial phase plug assembly (for applications where outer phase plug and horn form single moulding as part of front baffle)

8    Frequency Response

1. Tested for two hours on plane wave tube using continuous band-limited pink noise as per AES standard.  
Power calculated on minimum impedance.
2. Measured on axis at 1W/1m, using typical horn, in 2° anechoic environment.
